Project Title: TaskHub
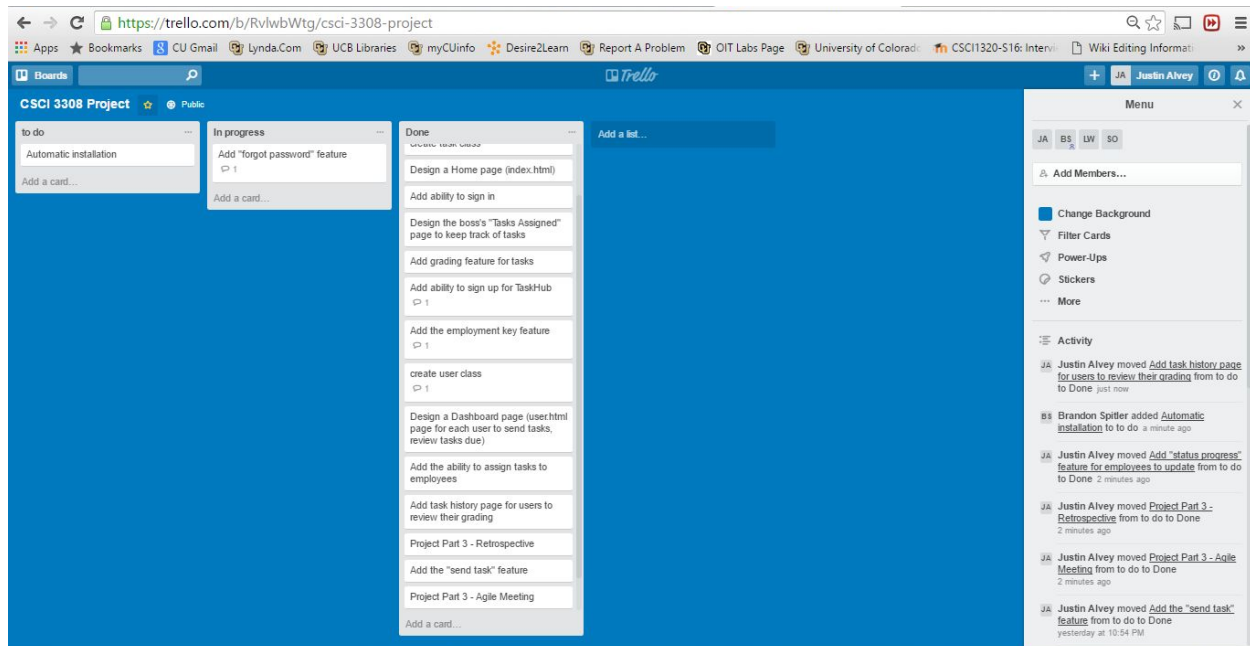

- **Members:** Justin Alvey, Sean O'Neal, Brandon Spitler, and Lucy Wilkinson

- **Project Tracker:** Trello

    Link: **https://trello.com/b/RvlwbWtg/csci-3308-project**

- # Video Demonstration:
    - **https://github.com/lucywilkinson/3308-project/blob/master/TaskHub.mp4**

- # VCS:
    - **Link: https://github.com/lucywilkinson/3308-project**
    - **Source Code:**
        1.) All folders (bootstrap, css, dist, font-awesome, fonts, functions, img, includes, js, pages, plugins, scss, styles, template)
        2.) index.php
        3.) home.php
        4.) editTask.php
        5.) addingTaskPopUp.php
        6.) login.php

7.) network.php

8.) user_input.php

9.) tasks_sent_dash.php

10.) change_grade.php

11.) emp_req.php

12.) Insert_emp.php

Note: For more information on how the code runs and works together, see our README.md file:

(https://github.com/lucywilkinson/3308-project/blob/master/README.md)

● Auto-doc Documents:

- **Doxygen was used**
- **Link to Generated Docs:**
    - **https://github.com/lucywilkinson/3308-project/tree/master/AutoDocHTML**
- **Link to Generate HTML Pages:**
    - **http://lucywilkinson.github.io/3308-project/**
- **If the links don't open correctly, try retyping them as github doesn't like PDFs for some reason**

● Video of Demo:

- **https://github.com/lucywilkinson/3308-project/blob/master/TaskHub.mp4**

● READMe.md:

- **https://github.com/lucywilkinson/3308-project/blob/master/README.md**
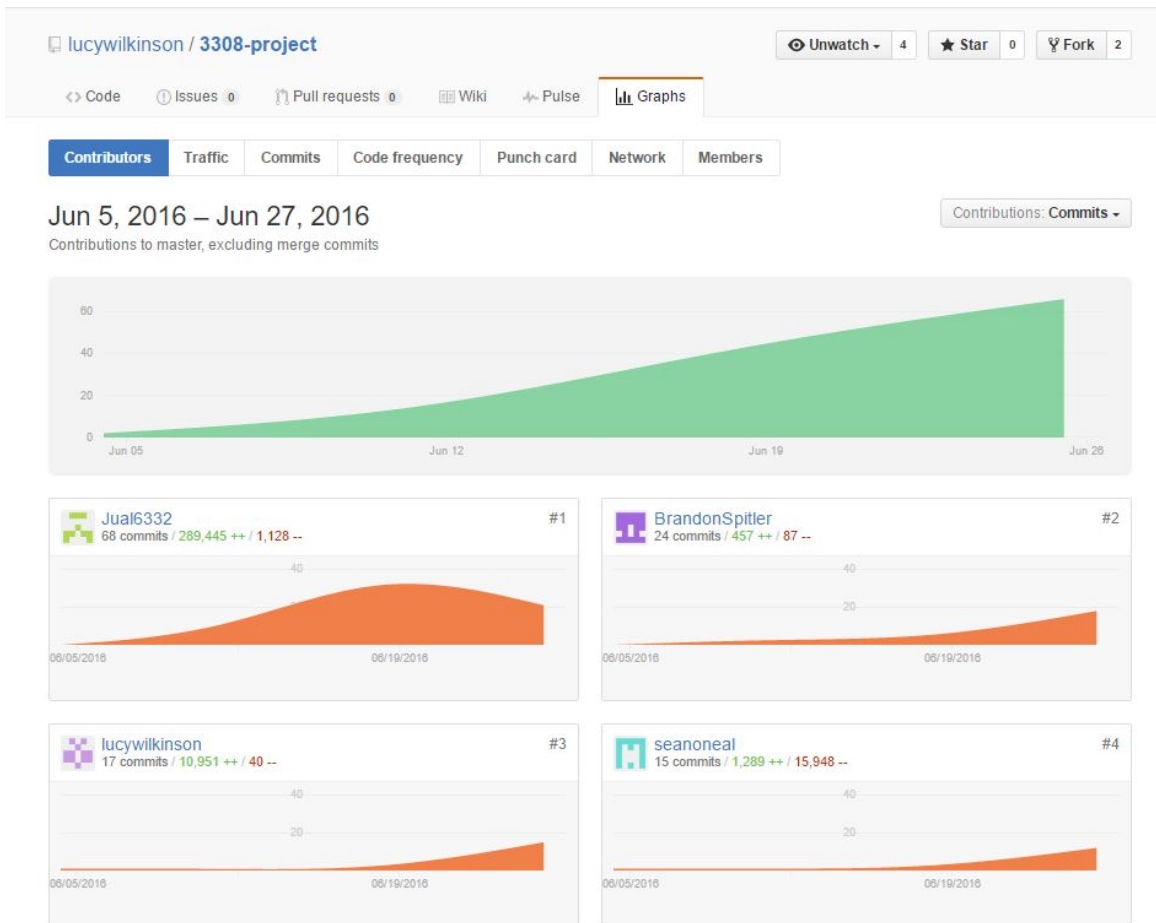

● This Project Part 4 Document:

- **https://github.com/lucywilkinson/3308-project/blob/master/TaskHub_Part4Finish.pdf**

● GitHub Contributions:

● Deployment Environment:
- **Taskhub makes use of the LAMP stack in software development**
    - Linux, Apache, MySQL, and PHP
- **Linux operating system**
- **Apache local server**
- **MySQL for database management**
- **PHP scripting language to connect to mysql database and webpage**
- **TaskHub was not concretely deployed to an online server**
    - *TaskHub.site is coming soon*
    - But for now, TaskHub is run on a local Apache server
    - Xampp is a popular platform used for this project, and runs both Apache and MySQL
        - From the control panel, click "Start" for both Apache and MySQL

- ○ **For step-by-step instructions in running this software locally, see the "Deployment Environment Overview" and "Deployment Environment Setup" sections of the ReadME.md file**
  - ■ **TaskHub also works on Windows. Setup is [here](#) along with Max OS X and Linux**
